

**English Remediation Subcommittee Meeting
Monday April 1st, 2019**

English Remediation Subcommittee

Purpose

The purpose of the meeting was to review and revise the College Student Readiness Framework that was prepared by the Research and Evaluation Working Group and to receive an update on the Literacy Cadre's activities.

Research and Evaluation Working Group- College Student Readiness Framework

The College Student Readiness Framework was prepared by the Research and Evaluation Working Group for the purposes of letting educators and parents know what students should know on day 1 of college. A draft of the document is still being finalized. The Subcommittee's conversation focused on potential edits that should be made to the document before it is completed to ensure that it covers all aspects of reading and writing while maintaining readability.

Literacy Cadre Update

Amy Baker-Sheridan presented an update on the Literacy Cadre's activities for the year. As the group has successfully fulfilled its mandate, it was decided that they would begin to consider transitioning from planning activities to implementation ones. To assist with this transition the working group will rewrite its goals, objectives, and design guides to better align with their new direction.
